PROFESSIONAL PROFILE: Motion Designer | 2D/3D Animation | Creative Technologist

Motion Designer with 10+ years creating high-quality 2D and 3D motion graphics across campaigns, product experiences, and brand content. Proven ability to translate design concepts into visually impactful animations while working across multiple projects simultaneously. Strong expertise in After Effects, 3D workflows, and emerging creative technologies including AI tools. Berlin-based creative technologist with experience delivering polished motion assets for global brands, mobile products, and digital platforms. Collaborative team player comfortable in fast-paced environments with exceptional attention to craft and detail.

CORE COMPETENCIES

Motion Design & Animation:
After Effects • Premiere Pro • 2D/3D Motion Graphics • Product Renders • UI Interactions • Environment Animation
3D Production: 3D Modeling • Asset Integration • Visual Storytelling • Particle Systems • Real-time Rendering
Design Tools: Photoshop • Figma • Illustrator • Storyboarding • Animatics • Graphic Layouts
Creative Technology: AI Tools (Runway ML, Midjourney, Stable Diffusion, ComfyUI) • Unreal Engine • Unity • Generative Workflows
Professional Skills: Cross-functional Collaboration • Asset Management • Multi-project Management • Fast-paced Production • Design-driven Execution

PROFESSIONAL EXPERIENCE

FREELANCE MOTION DESIGNER & CREATIVE TECHNOLOGIST | Berlin, Germany Motion Design & Visual Production | November 2022 – Present

- Produced high-quality motion graphics and animations for diverse clients, translating creative briefs into polished visual assets across social, content, and product applications
- Created 2D and 3D motion sequences including particle effects, environmental animations, and stylized visual storytelling using After Effects and real-time rendering engines
- Developed asset libraries and reusable templates enabling efficient production across multiple simultaneous projects while maintaining exceptional craft quality
- Experimented with AI creative tools (Runway ML, Midjourney, Stable Diffusion, ComfyUI) staying current with evolving motion and creative technology landscape

STARBERRY GAMES | Berlin, Germany Motion Designer – Creative Marketing | March 2021 – March 2022

- Produced motion graphics for mobile game marketing campaigns across social platforms, translating product features into engaging visual storytelling
- Created polished 2D animations optimized for social content and product-driven campaigns with strong attention to brand consistency
- Collaborated closely with creative leads, designers, and marketing teams in fast-paced agency-like environment
- Worked across multiple simultaneous projects delivering high-quality motion assets under deadline pressure
- Developed storyboards and animatics for campaign concepts, participating in creative reviews and feedback sessions

POPCORE | Berlin, Germany Motion Designer – Unity & Video Production | October 2019 – March 2021

- Produced 100+ motion graphics and video advertisements for mobile game products, maintaining exceptional craft across high-volume output
- Created functional motion assets across social, content, and product campaigns using Unity, After Effects, Premiere Pro, and Photoshop
- Worked with Figma for design handoffs and asset preparation, translating static designs into motion storytelling
- Collaborated with cross-functional teams including product, marketing, and creative leadership in agile production environment
- Managed asset libraries and organizational systems enabling rapid iteration without quality compromise

SENSORIUM | Remote VFX Artist – Audio Visualization | August 2023 – December 2024

- Produced motion graphics and 3D visual assets for VR entertainment platform, creating environment animations and UI interactions for immersive product experience
- Developed cohesive visual storytelling through integration of 2D motion graphics with 3D assets and particle systems
- Collaborated with product designers and engineers across time zones, translating product requirements into functional motion assets
- Delivered high-quality renders and animation sequences under tight production timelines

CATALYST – INSTITUTE FOR CREATIVE ARTS AND TECHNOLOGY | Berlin, Germany Instructor – Creative Technology | September 2024 – December 2024

- Taught creative coding and motion visualization, creating curriculum that translated complex technical concepts into accessible visual storytelling
- Developed storyboards, demonstration assets, and educational animations for diverse learning audiences
- Mentored students on craft refinement, design-driven execution, and staying current with visual trends

TLM PARTNERS | Remote VFX Artist – Virtual Production | August 2021 – April 2022

- Created 3D visual assets and motion graphics for VR entertainment platform using real-time rendering technology

- Developed environment animations and particle effects integrated into cohesive product experience
- Collaborated with international creative team across design, product, and engineering disciplines

INTRO ELECTRONIC MUSIC FESTIVAL | Beijing, China Visual Producer & Motion Designer | May 2011 – September 2018

- Produced motion graphics and screen content for large-scale live events, managing complex multi-project production timelines
- Created storyboards, visual concepts, and final motion assets for festival brand experiences across multiple years
- Collaborated with creative directors, lighting designers, and technical teams delivering cohesive visual storytelling

REDPILL VR | Los Angeles, CA (Remote) Virtual Reality Consultant | November 2019 – June 2020

- Provided motion design consultation for VR music experiences, translating 2D motion concepts into immersive 3D environments
- Designed UI interactions and visual interfaces optimized for virtual reality product experience

SATIS&FY AG | Berlin, Germany Video Technician – Live Events | November 2018 – September 2019

- Operated video production systems for corporate events and conventions, managing real-time content delivery
- Collaborated with production teams on motion graphics integration and technical execution

EDUCATION & CREDENTIALS ARTCENTER COLLEGE OF DESIGN | Pasadena, California Bachelor of Arts – Illustration | 1998 – 2002
Strong foundation in visual storytelling, composition, color theory, and design fundamentals applied to motion graphics practice.

TECHNICAL PROFICIENCY

Adobe Creative Suite (Expert): After Effects • Premiere Pro • Photoshop • Illustrator
Design & Collaboration: Figma • Storyboarding • Animatics • Graphic Layouts • Asset Management
3D & Real-time: 3D Modeling • Unreal Engine • Unity • Blender
AI & Emerging Tools: Runway ML • Midjourney • Stable Diffusion • ComfyUI • Generative Workflows
Production: Multi-project Management • Fast-paced Delivery • Cross-functional Collaboration • Agile Workflows
